### **CHEMISTRY SAT II TEST PREP** **NEW**

In preparation for the October 5, 2019 Chemistry SAT II Test

The College Board SAT Subject Tests are designed to help you demonstrate your interest and competence in a particular subject for prospective colleges. Due to the rigor of the Chemistry SAT subject test, this course is designed for students who have completed and done well in accelerated chemistry. A diagnostic practice test is given to help students identify their key areas to focus on. Four learning modules will guide students through the content, emphasizing topics not covered in the first-year course, as well as familiarizing students with the format of the exam and test-taking strategies. Following the 4 learning modules is a full proctored practice exam and final review day.
